16<sup>th</sup> August 2002

### **INTERCONNECTOR TERMINAL - LIQUIDS DELIVERY CONTAMINATION**

Interconnector (UK) announced today that, following delivery of liquids from the NTS, the clean-up operations at its Bacton Terminal and pipeline facility were going according to plan.

Unless there was a material change meanwhile, therefore, it was not proposed to make a further release until 15.30hrs on Monday 19th August.

### **INTERCONNECTOR (UK) LIMITED – BACKGROUND**

Interconnector (UK) Ltd, or IUK, operates a sub-sea pipeline and terminal facilities connecting the UK and continental Europe. The company's 40" diameter carbon steel pipeline stretches 230 kilometres between Bacton in north Norfolk and Zeebrugge in Belgium. It is capable of transporting 20 billion cubic metres a year (bcm/yr) from Bacton to Zeebrugge and 8.5 bcm/yr in the opposite direction.

Owned by ten major companies IUK has sold capacity in the pipeline to gas shippers. A dedicated and award winning IT system, ISIS, manages the volumes and flows and provides constantly updated information to IUK and its customers.

Further information on IUK can be obtained from [www.iuk-isis.com](http://www.iuk-isis.com)
