INTERCONNECTOR TERMINAL - LIQUIDS DELIVERY CONTAMINATION

Interconnector (UK) Limited (“IUK”) announced today that clean-up operations were continuing as planned and that limited flows to the Continent through Zeebrugge had now commenced.

IUK continues to monitor flows for quality stability and, as a precaution, has arranged for standby blending facilities and also pigging capability if necessary.

IUK would not propose to make a further statement on this incident unless there is a material change in events.

INTERCONNECTOR (UK) LIMITED – BACKGROUND

Interconnector (UK) Ltd, or IUK, operates a sub-sea pipeline and terminal facilities connecting the UK and continental Europe. The company’s 40” diameter carbon steel pipeline stretches 230 kilometres between Bacton in north Norfolk and Zeebrugge in Belgium. It is capable of transporting 20 billion cubic metres a year (bcm/yr) from Bacton to Zeebrugge and 8.5 bcm/yr in the opposite direction.

Owned by ten major companies IUK has sold capacity in the pipeline to gas shippers. A dedicated and award winning IT system, ISIS, manages the volumes and flows and provides constantly updated information to IUK and its customers.

Further information on IUK can be obtained from www.iuk-isis.com
