---

### **INTERCONNECTOR LAUNCHES NEW INTERNET SITE**

Interconnector announced today the launch of its new website [www.interconnector.com](http://www.interconnector.com) that has been developed to publish current and historic pipeline data, including daily flow rates, pipeline direction and capacity bulletins. The Internet site increases visibility of spare pipeline capacity for current Interconnector stakeholders and potential customers. Managing Director Roger Cornish speaking at the Flame Conference today (20<sup>th</sup> March) said “The website is another example of Interconnector’s commitment to openness and leadership in the liberalisation of Europe’s Energy Markets.”

The website was developed in conjunction with Nexus Internet Solutions Limited and EDS using data feeds from the pipeline gas management system, ISIS. This is the first phase of the development which is intended to become a comprehensive information service for the European energy community.

### **INTERCONNECTOR (UK) LIMITED – BACKGROUND**

Interconnector (UK) Ltd (IUK) operates a sub-sea pipeline and terminal facilities connecting the UK and continental Europe. The company’s 40” diameter carbon steel pipeline stretches 230 kilometres between Bacton in north Norfolk and Zeebrugge in Belgium. It is capable of transporting 20 billion cubic metres a year (bcm/yr) from Bacton to Zeebrugge and 8.5 bcm/yr in the opposite direction.

Owned by ten major companies, IUK has sold capacity in the pipeline to gas shippers. A dedicated and award winning IT system, ISIS, manages the volumes and flows and provides constantly updated information to IUK and its customers.

Further information on IUK can be obtained from [www.interconnector.com](http://www.interconnector.com).
