## Interconnector (UK) Limited

[www.interconnector.com](http://www.interconnector.com)

**23<sup>rd</sup> September 2003**

Following completion of the shutdown programme Interconnector is currently experiencing water content in gas arriving at Zeebrugge. Interconnector is working closely with Fluxys who are co-operating to resolve the matter by blending gas at a reduced flow rate. Gas entering the line at Bacton has been within normal limits for the last 30 hours.

### **INTERCONNECTOR (UK) LIMITED – BACKGROUND**

Interconnector (UK) Ltd (“IUK”) operates a sub-sea pipeline and terminal facilities connecting the UK and continental Europe. The company’s 40” diameter pipeline stretches 230 kilometres between Bacton in north Norfolk and Zeebrugge in Belgium. It is presently capable of transporting 20 billion cubic metres a year (bcm/yr) from Bacton to Zeebrugge and 8.5 bcm/yr in the opposite direction.

Owned by ten major companies IUK has sold capacity in the pipeline to numerous gas shippers. A dedicated and award winning IT system, ISIS, manages the volumes and flows and provides constantly updated information to IUK and its customers.

Further information on IUK can be obtained from [www.interconnector.com](http://www.interconnector.com)
