### **INTERCONNECTOR – FURTHER ENHANCEMENT**

Interconnector today reported that it had received expressions of interest from a substantial number of companies in response to its information brochure issued last month. The brochure detailed Interconnector's proposals for a further enhancement of its reverse flow (U.K. import) capacity.

Interconnector is now reviewing these expressions in conjunction with the relevant companies.

Meanwhile, the current reverse flow enhancement is on schedule for completion by 1st December 2005 while the further enhancement could be on-stream as early as October 2006.

### **INTERCONNECTOR (UK) LIMITED – BACKGROUND**

Interconnector (UK) Ltd (“IUK”) operates a sub-sea pipeline and terminal facilities connecting the UK and continental Europe. The company’s 40” diameter pipeline stretches 230 kilometres between Bacton in north Norfolk and Zeebrugge in Belgium. It is presently capable of transporting 20 billion cubic metres a year (bcm/yr) from Bacton to Zeebrugge and 8.5 bcm/yr in the opposite direction.

Owned by ten major companies IUK has sold capacity in the pipeline to numerous gas shippers. A dedicated and award winning IT system, ISIS, manages the volumes and flows and provides constantly updated information to IUK and its customers.

Further information on IUK can be obtained from [www.interconnector.com](http://www.interconnector.com)
