INTERCONNECTOR FLOW PUBLICATION CHANGE

Interconnector announced today that the time at which gas flow data is published on the interconnector website www.interconnector.com will be brought forward to 16:00 hours UK Time on the afternoon following the gas day. Visitors are able to access interactive charts and download historical flow information from the site as well as access other information regarding maintenance and flow direction history.

This change has been made to align the timing of the release of this information with other industry publications and to provide earlier access to gas flow data for the markets. Interconnector previously published this information at 10pm in the evening following the gas day.

A gas day is a 24 hour period ending at 06:00 hours.

INTERCONNECTOR (UK) LIMITED – BACKGROUND

Interconnector (UK) Ltd, or IUK, operates a sub-sea pipeline and terminal facilities connecting the UK and continental Europe. The company's 40" diameter carbon steel pipeline stretches 230 kilometres between Bacton in north Norfolk and Zeebrugge in Belgium. It is capable of transporting 20 billion cubic metres a year (bcm/yr) from Bacton to Zeebrugge and 8.5 bcm/yr in the opposite direction.

Owned by nine major companies IUK has sold capacity in the pipeline to gas shippers. A dedicated and award winning IT system, ISIS, manages the volumes and flows and provides constantly updated information to IUK and its customers.

Further information on IUK can be obtained from www.interconnector.com
